

# Certified Service

Visit a Certified Service EV expert to help maintain range and EV performance. From convenient scheduling options to an expert-led experience that keeps people in the know, we always add value to our customer's experience.

## EV HEALTH CHECK

### What is a Vehicle Health Check?

A comprehensive multi-point inspection of your EV. A Vehicle Health Check will provide a comprehensive report on the condition of your EV and may discover potential issues before they become costly repairs.

#### What's Included?

- Tire Rotation and Inspection
- Brake Inspection
- 12V Battery condition
- Fluid Check & more

### Why Get One?

- Helps improve the safety of your EV
- Helps protect against unexpected future repair costs
- To be completed every 12,000 km as described in your vehicle Owner's Manual

## EV MAINTENANCE

EV tires do a lot of heavy lifting as the EV battery adds significant weight. The instant torque delivered by your EV can lead to increased stress on your tires. When tires are not rotated properly, they may wear unevenly and prematurely. Regular tire rotations can help prolong the life of your tires and improve overall performance.

EV brake pads and rotors can wear down slower because of the EV regenerative braking capabilities. Switching between regenerative braking and using the physical brakes may help them last even longer.

A healthy 12V battery can help to ensure that your EV systems, onboard computers and features will operate at their best.

Windshield wiper blades should be inspected for damage regularly. Healthy windshield wiper blades help ensure you see the road clearly, improving vehicle safety.

A clean cabin air filter helps provide cleaner air into your vehicle by removing dirt, dust, pollen and other unwanted pollutants.

Coolant can protect your vehicle against winter freeze-up, summer boil-over, and corrosion in the cooling system by helping maintain the right temperature.

At least twice a year, spring and fall, use plain water to flush any corrosive materials from the underbody.

## SCHEDULING MADE EASY

We make it simple and convenient for customers to schedule service appointments with us:

On the go with your vehicle mobile app<sup>1</sup>

Online through your local dealer site or MyCertifiedService.ca

Through the infotainment system, through MyBrand In-Vehicle App<sup>2</sup>

By contacting the dealer directly

<sup>1</sup> MyBrand App: Available on select Apple and Android devices. Service availability, features and functionality vary by vehicle, device and the plan you are enrolled in. Terms apply. Device data connection required. Actual images and features may vary and are subject to change.

<sup>2</sup> In-Vehicle Apps (GM): App functionality and feature availability vary with vehicle equipment and trim level. Data connection may be required and data charges may apply. Requires an active service plan and working electrical system. Terms and limitations apply.
